DESIGN PHILIPPE STARCK 2004

320 lbs

1 x 250W T10 Halogen

Outdoor floor lamp providing direct and diffused light. Outer diffuser woven of colored PVC tubing over internal stainless steel structure. Inside diffuser made of injection-molded translucent polycarbonate. The structural parts of the lamp (base support, diffuser supports, arms, yokes, levers and tie rods) are galvanically treated for a high resistance to weathering. The springs and the primary mechanical components of the lamp are made with specific materials also suited for a high resistance to corrosion. The lead weights in the base have been reinforced to maintain stability of the fixture outdoors. 30' long polarized transparent power cord with plug - no dimmer or switch is provided, lamp must be switched from the receptacle control.
